WORK EXPERIENCE

Plotlabs Technologies | Temo.ai - AI Powered Interactive Demos

Delaware, USA

Software Developer - 2

June 2023 - Present

- **Project Inception:** Initiated the Temo.ai project, developing from scratch using Next.js, creating a robust and scalable product.
- **Chrome Extension Development:** Developed a Chrome Extension single handedly for user interaction capture and recording DOM interactions.
- **Video Processing Feature:** Developed a custom video processing service using ffmpeg, integrating multimedia functionality into the app, and enhancing media handling capabilities.
- **Image Editing Tool Creation:** Created a dynamic image editing tool using the Canvas API with Sharp library, offering advanced editing features.
- **Feature Lifecycle Management:** Developed and took end to end features ownership, from API design to deployment and database handling.
- **AI Integration:** Implemented AI features for demo summary automation and voice generation, utilizing Langchain and OpenAI APIs to augment user experience.
- **Design and Performance Optimization:** Crafted responsive designs with Figma, and optimized web performance, using TailwindCSS for styling to achieve a sleek, modern UI.

Plotlabs Technologies | Lessonbee.com - Health Education Platform

New York, USA

Software Developer

Sept 2022 - June 2023

- **Platform Revamp Leadership:** Led the overhaul of the Lessonbee platform with Next.js 13, modernizing the tech stack and enhancing functionality.
- **AI-Driven Enhancements:** Introduced AI-driven features for an AI Semantic Search in the help section and a learning catalogue search, making the platform more user-friendly and intelligent.
- **CMS Integration:** Streamlined content management by setting up Hubspot as the CMS, optimizing team's content workflow for efficiency and agility.
- **Feature Ownership:** Managed the end-to-end development of various key features, ensuring alignment with user needs and the company's fast-paced growth objectives, using technologies like Next.js, React & Node.js.

SmartTask

Software Developer Intern

Aug 2022 - Oct 2022

- **Landing Page Development:** Worked on the development of website's new landing pages using Angular and Bootstrap with SASS/CSS.
- **Optimizing Page Load Times:** Optimized initial load times for the landing pages while making responsive UI layouts.
